

College of Veterinarians of British Columbia

Continuing Education Approval Criteria

Published October 31, 2019, Effective January 1, 2020

The College of Veterinarians of British Columbia (CVBC, ‘College’) is the professional regulatory body responsible for mandated continuing education for registered veterinarians in BC. The CVBC bylaws (s. 253) establish that the Continuing Competence Committee (CCC) is responsible for administering the College’s Continuing Competence program, established by the College pursuant to s. 3(2)(c) of the *Veterinarians Act*. The intent of Continuing Education (CE) is to maintain, expand and improve professional skills and knowledge in relevant areas of professional activities on a continuing basis. The following criteria have been developed in consideration of CVBC bylaw s. 254(1) and under the authority granted to the CCC by bylaw s. 254(2).

General Requirements

Each registered veterinarian is required to earn a minimum of 30 credit hours of CE every 2 years. The CVBC has established that the 2-year cycle for every registrant is from January 1st of an odd year to December 31st of the next even year (eg. January 1, 2019 – December 31, 2020), regardless of the date of initial registration¹. At the time of registration renewal (including status changes)², each registrant must report to the Registrar’s Office the total number of CE hours acquired during the previous calendar year, including the details of each session.

Any remote-learning sessions that a registrant wishes to apply towards required CE hours must be RACE³-approved and relevant to that registrant’s scope of practice. The CVBC may consider approval for distance courses that are presented/offered by AVMA-accredited institutions or North American veterinary regulatory bodies, but such requests will be considered on an individual basis.

An in-person CE session that is either CVBC or RACE-approved is considered appropriate, provided the session is relevant to the registrant's area(s) of professional activity.

¹ [Continuing Competence Committee Policy: Defining the 2-Year Continuing Education Cycle](#), - for new registrants, proration will be based on registration date – the proration schedule is detailed in the policy

² Proration of CE hour requirements will occur where required by the Bylaws

Criteria for CE Approval

I. Criteria for organizations wishing to provide CVBC-approved CE

a) Content⁴

Generally, programs with the following content may be considered appropriate:

1. Relevant to animal health or welfare,
2. Relevant to practice management or communications,
3. Relevant to professional ethics, or
4. Otherwise intended to improve the registrant's skill in the delivery of veterinary services.

Sessions with topics considered to be alternative/complementary/integrative medicine will be acceptable *if designed for an audience of veterinary professionals*.

b) Presenters

Speakers for CVBC-approved continuing education programs must possess advanced knowledge or skill relevant to the proposed topic as demonstrated by one or more of the following:

- board certification,
- Ph.D.,
- research experience, and/or
- past lectures, publications, or relevant experience/training recognized by professional peers⁵.

In addition to having demonstrable qualifications, speakers should have a positive professional reputation in peer organizations.

The presenter must be suitably qualified to speak on the presented topic at such a level that will benefit the target audience (veterinarians) by refreshing or furthering the audience's skills and knowledge in that subject area.

c) Program Delivery Format⁶

All remote-learning CE formats must be RACE-approved. If not RACE-approved, the CVBC may individually consider for approval remote-learning courses that are either presented/offered by (1) AVMA-accredited institutions or (2) a North American veterinary regulatory body.

The CVBC's CE Approval Criteria as defined in this document will apply to in-person sessions that

⁴ The CVBC Council has approved the *Continuing Competence Committee Position Statement: Continuing Education Program Content* (published May 2019)

⁵ "Professional peers" refers to individuals who possess the same or similar qualifications, knowledge and abilities

⁶ The CVBC Council has approved the *Continuing Competence Committee Position Statement: Continuing Education Program Formats* (published May 2019)

are not already RACE-approved.

The method of delivery must be appropriate to the educational content, objective, and purpose of the program, and presented in an efficient manner that will best benefit the audience. The method(s) of delivery should, where practical, encourage active participation and involvement by the attendee.

Definitions:

Seminar/Lecture –in-person or face-to-face programs, where presenter(s) and attendees are in the same location and where the event takes place in real time. Examples: lectures, role-playing, and presentations (cases, study/research findings).

Workshop/Wet Lab – face-to-face programs that allow attendees to have hands-on experience, training and/or practice of the techniques being taught. Should have an adequate participant-to-instructor ratio to maximize the participant’s learning experience and real-time feedback from instructors.

Remote Learning/Distance – must be RACE-approved (see notes above in I(c) about possible consideration of non-RACE approved course); could be either interactive or non-interactive. The definitions below are drawn from the *RACE Standards for Approved Providers of Continuing Veterinary Medical Education*:

Interactive – allows interactions and feedback between the presenter and the attendee. Provide ongoing, scheduled, interactive experiences for participants by providing timely access to both technical personnel and professional faculty as well as interactivity among participants (eg. Q&A sessions via instant message or a moderated teleconference). There is a mechanism to document participation, the ability to be flexible and to supplement the participant’s learning experience in response to the individual and collective participants’ progress and feedback during the course period. Examples: webinar, video conference.

Non-Interactive – independent or self-study program where there is no direct interaction between presenter and attendee. There is no scheduled date for participation. Evaluation of participation is via a post-course test. Examples: online courses, videos, pre-recorded webinars/presentations.

NOTE: The following are not CE formats recognized by the CVBC for credit:

1. Reading of publications (articles, journals, texts)
2. Preparation and delivery of presentations delivered as CE
3. Preparation of articles, reviews, textbook chapters or other manuscripts for publication

II. Criteria for CVBC registrants to self-assess CE opportunities for their suitability for credit

A self-assessment of CE opportunities for suitability must include verification based on both of these factors:

- a) Relevance to area(s) of professional activity (current or proposed),

And

- b) CE not previously approved must be individually evaluated by the registrant in accordance with the criteria set out in this document, before making application to the CVBC for approval.

Process for CE Approval

- a) Application

CE Approval Applications must provide the following information:

1. Name of sponsor/provider/host organization
2. Session Title, plus info/description or key points covered or detailed agenda
3. Name and credentials and biography of Speaker/Instructor
4. Method of delivery (eg. lecture, wet-lab, workshop)
5. Location(s), date(s) and time(s) of session
6. Length of Session & Number of CE Credit Hours being applied for
7. Registration information
8. Sample of document that will be provided to attendees as proof of completion

The appropriate CVBC application form must be completed and submitted before consideration will be given. Formal CVBC approval is a prerequisite prior to the event being promoted as CVBC-approved CE and before it will be posted on the CVBC's website. Seeking approval of CE sessions after the session has occurred is possible, but the applicant/registrant accepts the risk that approval may not be granted and further (approved) CE will need to be acquired.

- b) Calculation of CE Credit Hours

CE credit hour value awarded to CVBC-approved in-person CE sessions will be determined using the same model applied by RACE:

- CE credits must be calculated for each program segment.
 - A program segment is defined as a portion of the program an individual is expected to attend in its entirety. It may be a single lecture, or an entire program comprised of several lectures all with a single track (subject matter category). Where a program segment consists of several lectures within a single subject category, there may be multiple speakers and various topics, and all content and presenter qualifications must meet CVBC standards for that category.
- One CE credit hour is awarded for 50-60 minutes of actual instruction.
- CE credits will be awarded at a minimum of 0.25 credits (= minimum of 15 minutes of

instruction). No program that provides less than 15 minutes of instruction (0.25 credits) will be considered for approval.

50 – 60 minutes of instruction	1 CE credit hour
25 – 49 minutes of instruction	0.5 CE credit hour
15 – 24 minutes of instruction	0.25 CE credit hour

- One academic credit granted by a recognized educational institution⁷ will be considered equal to 15 CE credit hours and is granted the equivalent of 15 hours of in-person lecture time.
